ALILA PURNAMA SAMPLE ITINERARY

RAJA AMPAT EXPEDITION

7 Days / 6 Nights Journey

Raja Ampat, which translates literally as 'the Four Kings', is an archipelago of over 1,500 small islands located off the northwest tip of New Guinea in Indonesia's West Papua province.

The Raja Ampat Islands are a truly beautiful paradise that remains relatively untouched due to the islands' remoteness. As far as underwater beauty goes, the waters in this region are unbeatable, a mecca for diving teeming with over 1,600 fish species and over 600 coral species. It is believed that the diversity of marine life here is the highest recorded on Earth, making for some truly spectacular snorkelling and diving.

The above-water beauty is no less stunning – dense tropical forests, unique flora, astounding rock formations, and an amazing array of bird and wildlife. Sailing through the Raja Ampat waters, stopping for diving, island treks and picnics on quiet beaches promises an experience you won't soon forget.

PLEASE NOTE that the itinerary of our sea voyages may occasionally have to be modified due to factors beyond our control: unfavourable weather conditions, delays in progressing harbour clearances, changes to the schedules of domestic flights, etc. The Cruise Director and Captain of Alila Purnama will adjust the itinerary accordingly in the best interests and safety of guests and crew.
